

CURRICULUM IN AGRICULTURAL & BIOLOGICAL ENGINEERING

Fall 2013

UNIVERSITY of ILLINOIS at URBANA-CHAMPAIGN

For the degree of Bachelor of Science in Agricultural and Biological Engineering

AGRICULTURAL ENGINEERING CONCENTRATION

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, the environment, and related biological systems. The ABET-accredited B.S. Degree in Agricultural and Biological Engineering provides a concentration in **Agricultural Engineering** that includes the integration of physical and biological sciences as a foundation for engineering application in the design of systems for renewable energy, off-road equipment, water quality, and the utilization and protection of soil and water resources. Important design constraints are economics, conservation of materials and energy, safety, and environmental quality. Within this concentration, students are required to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor: Renewable Energy Systems, Off-Road Equipment Engineering, Soil and Water Resources Engineering.

TOTAL HOURS FOR DEGREE. . . 128

¹ RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is GE 101. Students may take SPCM 111 and 112 in place of RHET 105.

² MATH 220 – Calculus may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

³ Students must satisfy the 18-hour liberal education requirements of the College of Engineering, including ECON 103 (or either ECON 102 or ACE 100 by permission), and the campus general education requirements for social sciences and humanities.

⁴ ABE 469 satisfies the general education advanced composition requirement.

⁵ The extra hour of credit for this course may be used to help meet free elective requirements.

⁶ Students must complete at least 6 hours from the Biological and Natural Sciences approved list.

⁷ Students must complete 15 hours of technical electives; at least 8 hours must be from the approved list of ABE technical electives, and the remainder selected from the approved list of Other Technical Electives.
